The Alaska Arts Education Consortium and the Ketchikan Gateway Borough School Districts presents the:

Ketchikan Social Emotional Learning and the Arts Institute

Arts education is SEL education

Through the arts we recognize our:
•feelings & thoughts
•strengths and limitations
•uniqueness and that of others
•resiliency when llearning

The Ketchikan Social Emotional learning and the Arts Institute is a 5-day event designed to show how arts experiences help students develop self-management, self-discipline, and self-expression while growing interpersonal and relationship skills.

Held at Ketchikan High School, the teacher-leaders will model an environment that is flexible, understanding and supportive of multiple perspectives and experiences. Participants will use the arts as a venue through which to recognize and understand our own culture first and throughout the week consider and apply ways that we can transform classrooms in positive ways.
