
The Alaska Arts Education Consortium and the Sitka School District present the:

Sitka Arts, Culture & Technology Institute (ACT)

May 31-June 4, 2022

3 (500 level) credits available

When Sitka expressed an interest in partnering with AAEC on this event it was a perfect match. The Sitka School District has an Arts, Culture, and Technology Curriculum designed to support teachers in maintaining culturally responsive instruction through arts and innovative technology.

The focus of this Institute will be SE Alaska Culture and their arts, blended with technology. The team is presently in the process of planning this inaugural event. It will be designed to enhance the technological skills for a range of teachers from elementary through high school, and from tech novice to tech confident.

In an ever-changing technological landscape, where today's platforms are not tomorrow's platforms, the key seems to be that any one of these spaces can use a dose of humanity and art and culture ~ Ze Frank
